Close your eyes and listen.

To the pouring of water.

To the crumpling of a paper.

To the clapping of hands.

To the rustling of leaves.

Sounds have the power to create a different world for a listener.

Unmask the potential of things around you and make them your instruments.

Tell a story using these sounds and let the audience unleash their imagination

Sankalp invites entries for RADIO PLAY COMPETITION at 'Mukhaute'-The Annual Theatre and Cinema festival of MICA.
